# CB1&CB2 Rainbow shell assembly guide

Pic - 1

After get the shell, first of all, we need to do is tear stickers on the acrylic panel and then to install. The next we use Pic - 1 as a clue to make a simple installation instructions:
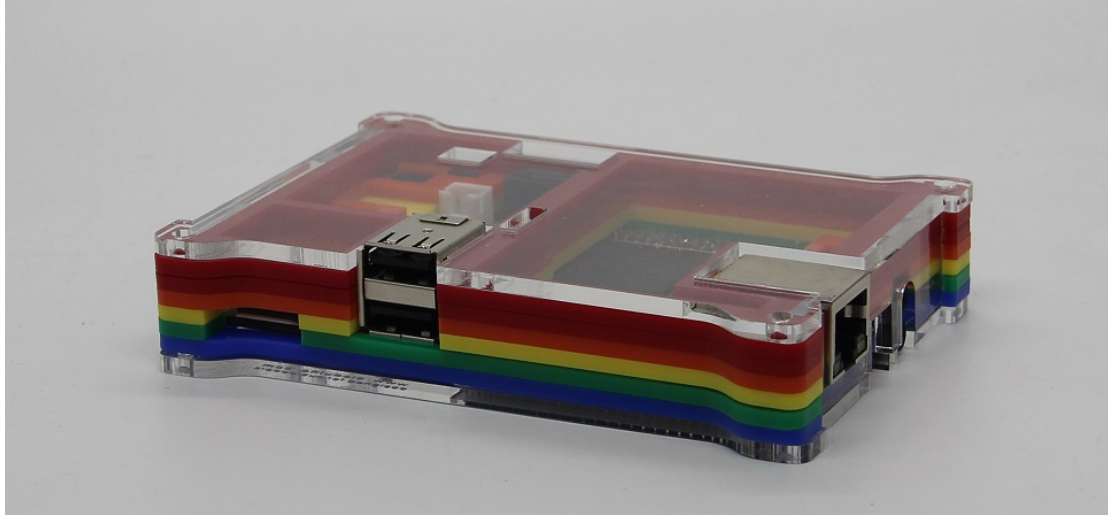

First，put on both sides of the two acrylic panel installed on both sides of the board，and then install it above the blue acrylic panel(Install the effect as shown in Pic - 2).

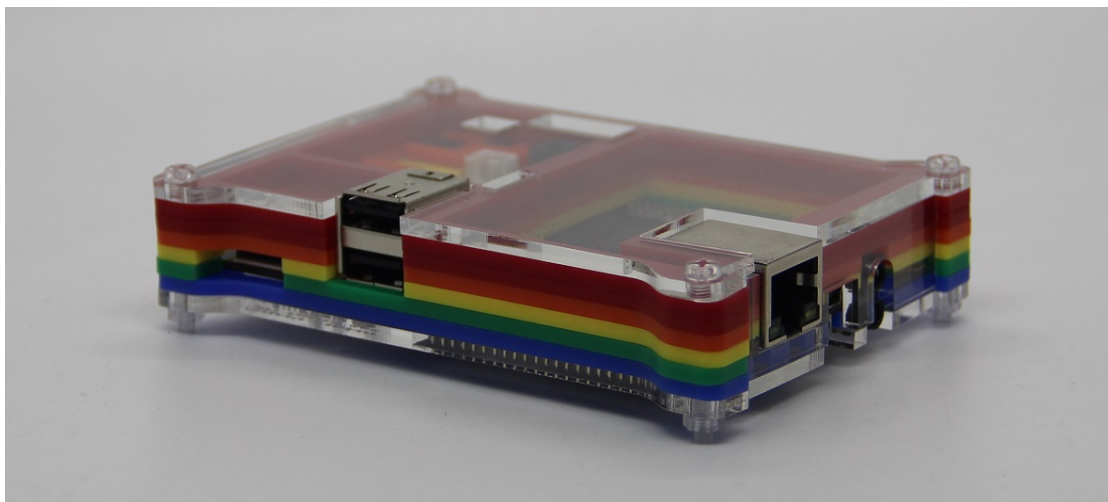

Pic - 2

Secondly, put the blue layer placed above the bottom panel, and then according to the

order from the bottom color is blue, green, yellow, orange and red, scarlet the order of the installation. When installation, we should pay attention to the direction of the color panel，specific refer to Pic - 1，and finally put the roof panel in(Install the effect as shown in Pic - 3).

Pic - 3

Finally, install the four screws in the positioning hole column, tighten the nut. And the entire installation is complete(Install the effect as shown in Pic - 4).
