

X-Powers AXP806

PMIC for multi-core high-performance system

Bucks LDOs and Switches

Revision 1.0

Overview

AXP806 is a highly integrated PMIC targeting at 5V applications that requires multi-channel Regulator outputs. It provides up to 7.5A current output through tri-phase Buck, and can make the battery powered total solution together with the battery manage unit.

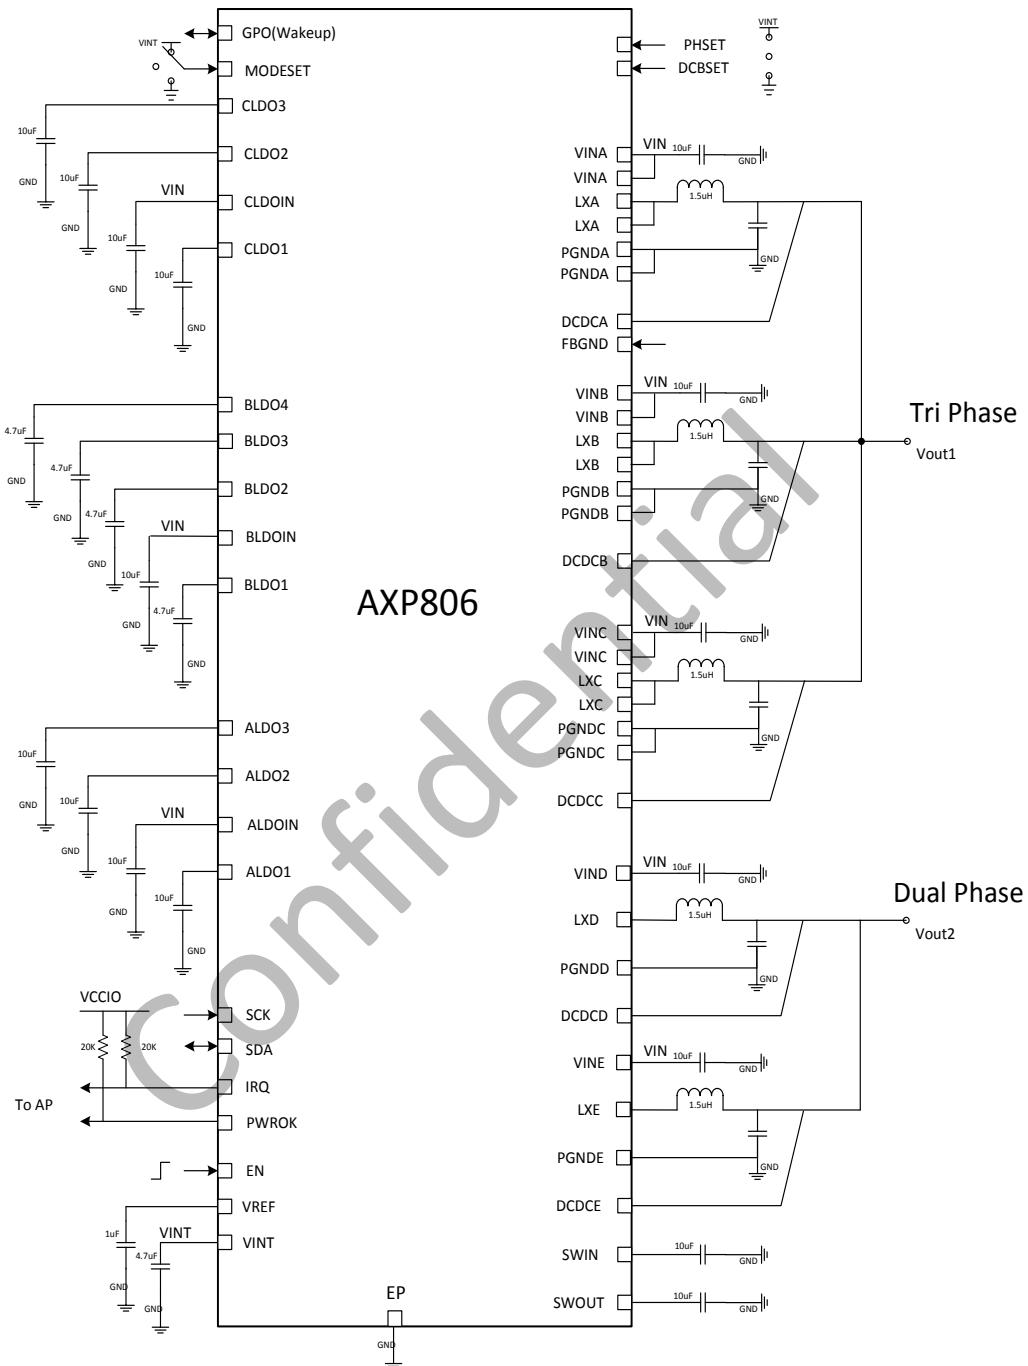

AXP806 supports 15 channels power outputs (including 5-CH Buck Bucks, 10-CH LDOs). To ensure the security and stability of the power system, AXP806 provides protection circuits such as OVP, UVP, OTP, and OCP. In addition, AXP806 embraces a fast interface for the system to dynamically adjust output voltage.

AXP806 is available in 7mm x 7mm 56-pin QFN package.
